PROJECTS

Critter Gitters Pro, LLC

Website utilizing custom logo design, HTML5, CSS3, animations, media queries, custom forms, and responsive images

Shopify Interface

Remote user interface to modify inventory utilizing React, JavaScript, NGROK, Polaris and Shopify App Bridge

Aircraft Weight and Balance Calculations

Stand-alone app for aircraft center of gravity calculations, written in Visual Basic, options for several aircraft models, inputs for pilot/passenger/cargo weights and custom seat configuration, resulting in printed form, with graph, as required by the FAA

Aircraft Overseas Delivery Bid Calculations

Stand-alone Visual Basic app calculates mileage by entering ICAOs (four letter airport codes) for each stop using longitude and latitude stored within the app, as well as crew salaries, fuel costs based on current fuel rates, expected usage and expected wind direction, etc.
